SECURITY INFORMATION

0841-4460

14 March 1952

TO: SE/SO
FROM: STC *DJ*
SUBJECT: Nicolae MALAYA

1. INS has questioned the validity of our memorandum of 6 March 1952. The information shown to them did not substantiate the general statement to the effect "is borne out by conclusive evidence from numerous sources of known reliability...." This memorandum was prepared by the SE Division. As is the established practice, it was reviewed in STC as to policy and form, but the Division position was accepted as to the substance of the factual information.

2. Action Required: It is necessary that the SE Division compile immediately the evidence upon which the quoted statement and the other allegations contained in the memorandum were predicated.

3. After these data are compiled in a presentable form, it will be necessary for a determination to be made by responsible Agency officials to decide whether the release of such data will affect the security of sensitive CIA operations to a point outweighing the inevitable loss of cooperation from INS which will follow a withholding of such data.

4. In view of the fact that STC is not cognizant of the operational details affecting this decision, it is requested that the Division include a specific recommendation as to the action desired.

5. This case is one of considerable import; it is necessary that sufficient personnel be assigned to any review required to complete the work at the earliest possible date.
